## FEATURES INCLUDE

### FRAGRANCE YOUR HOME

Our beautifully decorated Fragrance Lamps don't just look good, but also help fill your home with your favourite fragrances.

### PLATINUM BURNER STONE

Our Fragrance Lamps have a platinum coated burner stone connected to a cotton wick which is inserted into the bottle. The platinum coated stone acts as a catalyst.

### EASY TO USE

To use, remove the stone and wick and pour the Fragrance Oil into the Lamp bottle using the funnel supplied. Fill to two-thirds full leaving an air gap to allow air to circulate inside the Lamp bottle and for the catalytic process to work. Replace the stone and wick and place the small silver cap over the stone. Allow the wick to absorb the fragrance oil for around 20 minutes, then remove the silver cap and light the top of the stone, leave it to burn for 2-3 minutes until the flame reduces. This brings the stone up to optimum temperature for the most effective performance.

After this, blow out the flame and this will leave your Lamp working. Place the decorative silver top over the stone.

### CONSTANT RELEASE INTO THE AIR

The mix of oxygen and fragranced Lamp oil keeps the stone hot, by constantly drawing oil up through the wick and releasing it into the air. Using the Lamp for around half an hour will fill the room with the beautiful fragrance you have chosen.

### DECORATIVE SILVER TOP

To stop the Lamp, simply remove the decorative silver top and place the small silver cap over the stone. This cuts off the oxygen supply and stops it releasing fragrance.

### REMOVES UNWANTED ODOURS

Due to the design and function of these Lamps, when the alcohol is drawn through the catalytic system it is broken down into ultra-fine particles and spread through the air. These alcohol particles in the oil help remove unwanted odours and the pleasant scent of your chosen fragrance oil is diffused into the air.
